## High quality metal works and laser-cutting of metal from Estonia!

We are a company performing metal works in Estonia. Every month our workshop provides more than 50 tons of metal products for the Estonian and Scandinavian market.

Our daily activities include manufacturing of metal details for various forestry vehicles, tractors, containers, building structures, and other metal items.

We engage in laser-cutting and welding works. Our welders have proper welder's certificates. The completed products are painted or zined as desired by the customer.

### Technical data of our laser-cutting machine **Bystronic BTL2800**

- ♦ Laser capacity: 2800 W
- ♦ Cutting table size: 2000 x 4000 mm

### Maximum thickness of sheet material for laser-cutting:

- ♦ Steel: 15 mm
- ♦ Stainless steel: 8 mm

The size of our two workshops is 1000 m<sup>2</sup> and we employ altogether 15 men.

In case of interest, please contact us to receive a price offer for the product you need. An overview of our works is available on our homepage at [www.toci.ee](http://www.toci.ee).
